Instructions:

Ball with golden effect

- 1 Dab the inside of the both plastic ball halves with the white paint Chalky Finish. Let them dry thoroughly (at least one hour).
- 2 Spread unevenly the glue for foil on the entire outer surface of the ball's halves with the bristly fan brush.
- 3 Let it dry about 20 minutes until the glue becomes transparent.
- 4 Lay the foil with the metallic part facing up on the ball, press it well and then remove it again. If necessary, repeat the process.
- 4 Fasten the lurex tape as a hanger at the upper crosspiece.

Luminous ball

- 1 Spray the inner side of one plastic ball's half with the Chalky Finish Spray. Let it dry thoroughly (at least one hour).
- 2 Thread alternately a star-shaped spangle and a wax bead on and fix them by threading again the wire through the respective hole. Leave always a distance of about 5cm between the wax bead and the star-shaped spangle.
- 3 Then wrap the silver wire e.g. around a felt-tip marker (the diameter of about 8mm), take it off once again and pull the whole a bit apart.
- 4 Fill only the white ball's half with decorative feathers, the micro LED-fairy lights and finish with the threaded piece of wire. Wrap the fairy lights around the crosspiece and close the ball.
- 5 Attach the washi-tape „Love“ as a banner and decorate the ball with the decorative feather, a star-shaped spangle and a wax bead. If necessary, fix it with a hot glue.
