Mosaic tile Heart

WWW.RAYHER.COM

Used items:

36 097 000	Casting mould Tile	1 piece
34 410 102	Casting powder Raysin 200	350g
61 216 31	Craft wooden sticks	
14 861 572	Silky Glass Mosaic mix, matt	1 box
33 385 00	Mosaic glue	1 piece
14 601 00	Joint sealer, white	1 piece

Additionally you need:

69 078 000	Sandpaper, grit size 400
89 288 00	Aluminium ruler, 30 cm
38 032 00	Metal spatula with flexible blade

Water, kitchen scales, mixing vessel, sponge

Instructions:

Making tiles

1 In order to prevent the tile from being poured out obliquely, it is necessary to work on a horizontal and stable surface. Mix 350 g of the casting powder Raysin 200 with 100 ml of water, stir evenly by means of the craft wooden stick and pour it into the tile-shaped casting mould.

2 After approx. 1 hour, turn the casting mould over and demould the tile carefully. Now buff a bit the edges with the sandpaper.

3 The poured out tile should dry thoroughly out, preferably overnight.

Designing tiles with mosaics

4 First put the tesserae on the tile according to the pattern. If the pattern matches the one on the template, the single tesserae can be glued on with the mosaic glue. Use a pea-sized amount of mosaic glue per tessera. Finally straighten the horizontal and vertical lines out with the aluminium ruler. Allow them to dry out overnight.

5 Mix the joint sealer in a mixing ratio of 4:2 (four parts of powder & two parts of water) and stir it vigorously by means of the craft wooden stick. Then spread the joint sealer with the metal spatula into the joints, wipe off the remaining joint sealer with a damp sponge until the tesserae are clean. Let them dry well out.
