Bamboo to-go cup Transfer technology

Used items:

46 326 000	Bamboo to-go cup 600 ml, 10 cm ø	1 piece
38 880 000	Transfer medium	1/20 can
38 709 576	Porcelain & glass marker, black	1 piece
89 378 00	Craft scissors	
37 053 000	Set of brushes Hobby Kreativ	

Additionally you need:

Laser printout (reflected), pencil, dishwashing detergent and sponge

Instructions:

1 Before you start designing the bamboo to-go cup, clean the cup and lid with a sponge, detergent and water. Let the cup dry well out.

2 Cut the laser printout (flip the picture on the PC beforehand, required if a font is used) into shape with the craft scissors.

3 Trace very lightly this cut-out on the bamboo to-go cup with a pencil and place the picture with the front side facing up on your work surface.

4 With the synthetic flat brush, coat at first the selected part of the cup and then the front of the paper printout with transfer medium.

Important: Do not spread the transfer medium onto the rear side of the printout, otherwise the paper cannot be removed!

5 Place the printout face down and smooth it out by firm pressure with your hand. Excess medium at the edge can be removed with a cloth.

6 After 8 hours drying time, preferably moisten the paper with a sponge and carefully rub off the paper layer with your fingers or the painting sponge.

TIP: It is recommended to work in stages. Allow to dry it out over and over again between the rubbing processes and then repeat until the paper layer is removed up.

7 Let it dry out.

8 Use the well shaken black porcelain & glass marker to write your personal message on the cup.

9 Let the paint dry for at least 24 hours before using the bamboo cup.

10 Afterwards, you can rinse the bamboo cup by hand wash or clean it gently in the dishwasher at approx. 65° C.
