A piece of cake

WWW.RAYHER.COM

Used items:

34 229 000	Creative-soap	500 g
34 226 000	Creative-soap	200 g
34 246 313	Soap dye purple	
34 246 532	Soap dye nougat	
34 246 426	Soap dye evergreen	
34 221 000	Soap casting mould: cube	1 piece
34 223 000	Kneading-soap	250 g
89 799 000	Pastry bag with 4 tips	

Additionally you need:

86 198 000 Set of metallic cookie cutters
Kitchen scales, pot, melting pot, small plastic container, stirrers, kettle, cooking oil, craft stick, plastic lid or alum.foil

Instructions:

- 1 Melt the creative-soap in a water-bath on the stove (max. 60° - do not boil).
- 2 After the complete melting, you can stir the desired colour and/or fragrance oil in the liquid soap. Therefore, use a wooden spatula or a teaspoon. Pour it dropwise.
- 3 Prepare a soap sheet about 1.5-2cm thick out of the opaque soap and the purple soap dye (see instructions for soap sheets). Cut small irregular pieces out of the hardened dyed opaque & transparent soap sheets by means of a knife. Place these pieces in the cube-shaped soap casting mould.
- 4 Pour carefully the white opaque soap over the pieces in the soap casting mould. But you should pay attention not to pour it in one quick motion, but rather slowly throughout the casting mould by leaving 5mm empty from the upper border.
- 5 Before demoulding the cast soap, let it cool down thoroughly (at best one day).

- 6 Pour the chocolate glaze over the demoulded soap bar (see instructions for glaze). Make a cream rosette (see instructions for cream rosette) and a little rose (see instructions for the rose out of kneading-soap) out of the kneading-soap.
- 7 Push the little rose into the still wet cream rosette and fix the cream rosette with some liquid soap onto your cake.
- 8 Cut the soap bar into 4-5 slices (at best by means of a japanese spatula that is available in your local DIY store).

Instruction for the cake glaze

- 9 Melt the creative-soap in a water-bath on the stove (max. 60° - do not boil). After the complete melting, you can stir the nougat colour in the liquid soap. Therefore, use a wooden spatula or a teaspoon. Pour it dropwise.

TIME REQUIRED
1.5 HOURS
(WITHOUT DRYING TIME)

LEVEL OF DIFFICULTY

Instruction for the cream rosette

10 Mix the kneading-soap with hot water and the cooking oil, for e.g. 50g of the kneading-soap with 20ml of hot water and about 5ml of the cooking oil.

11 Stir this mixture with a craft stick and let it rest for 10 minutes. Then knead the mixture well again. Build together a pastry bag (without a bag) and fill it with some kneading-soap.

12 Push the kneading-soap with a finger through the tip and shape at once the pushed out mixture.

Instruction for the rose out of kneading-soap

13 Mix the kneading-soap with hot water, the cooking oil and the soap dye.

14 Stir this mixture with a craft stick and let it rest for 10 minutes. Then knead the mixture well again.

15 Take out from the mixture a ball 0.50 up to 1cm big (according the size of the rose) and shape a rose petal out of this ball that you should bend carefully to the middle of the rose. You can fix small cracks by a wet finger.

16 Now, shape the next rose petal in the same way and lay it onto the first one. Repeat the whole process with the next rose petals and lay them around. Bend a bit outwards the upper border of each flower petal.

Instruction for the soap sheet

17 Melt the creative-soap in a water-bath on the stove (max. 60° - do not boil).

18 After the complete melting, you can stir the colour in the liquid soap. Therefore, use a wooden spatula or a teaspoon.

19 Pour it dropwise.

20 Pour the melted soap onto a flat surface such as for e.g. a small lid or some aluminum foil.

Additional info

The soap dries or rather carries on ripening and becomes thereby firmer (two up to three weeks). Depending on the temperature and airiness, the soap can perspire. We recommend therefore to wrap the soap after its demoulding in a floral gift-foil (item no.81 489 00). Clean the soap casting mould and the pots with hot water.
