# Stencilled star out of concrete

[WWW.RAYHER.COM](http://WWW.RAYHER.COM)

## Used items:

<b>36 030 000</b>	Casting mould „Star“ 6.5 cm	1 pc
<b>34 152 000</b>	Creative-cement	100 g
<b>38 887 000</b>	Stencil „Basic“	1 pc
<b>38 000 576</b>	DecoArt All Purpose paint, black	3 ml
<b>33 291 00</b>	Quickie-Glue glue stick	1 pc
<b>39 420 640</b>	Flitter – ultra-fine, brilliant copper	some

## Additionally you need:

<b>89 476 00</b>	Sandpaper
<b>37 103 00</b>	Brush

Cooking oil, sieve, support out of Crepla or cardboard

## Instructions:

- 1 To start the preparation, put the casting mould on a solid and even surface, so that it doesn't wobble and coat its inside with cooking oil.
- 2 In order to remove the larger pebbles from the cement, you should sieve about 100 g of the cement powder before mixing with water, through an ordinary household sieve.
- 3 Pour about 10 ml of water (once the cement is sieved, the mixing ratio is changing according to the instructions on the package) in a plastic bucket and then gradually add approx. 70 g of the sieved creative-cement powder. Stir this mixture with a craft wooden stick until a uniform and castable mass is obtained.
- 4 Fill the prepared casting mould with the casting compound up to the desired height. Let the mixture rest for about 1-2 minutes. Thereby tap repeatedly and slightly onto the mould to release any air bubbles from the cement mixture.
- 5 Let it dry out overnight.
- 6 Now, you can demould the cured object by turning the casting mould around and laying it on a support out of Crepla or cardboard. Then carefully press slightly with the palm of your hand on the back of the casting object, so that the air penetrates between the casting object and mould. Tap the casting mould carefully on your support, so that the casting object becomes entirely detached from the mould.
- 7 Allow it to harden. The curing time varies depending on the size and the temperature (one to several days).
- 8 Small burrs and irregularities can be quickly & easily grinded with sandpaper.
- 9 Now, you can stencil the star out of concrete with the desired stencil and DecoArt All Purpose black paint by means of the stencil-brush/brush. Let it dry out.
- 10 As a special highlight, you can circle the stencilled outline with the Quickie Glue, scatter some tinsel, shake the rest off and let it dry out.
